2.					have been cancelled.
3.					are allowed.
4.		Claims			are rejected.
5.		Claims	<del></del>		are objected to.
6.	匁	Claims	3-6, 11	-12, 16-17 are subject	t to restriction or election requirement.
7.		This application has been filed with informal drawings under 37 C.F.R. 1.85 which are acceptable for examination purposes.			
8.			formal drawings are required in response to this Office action.		
9.		The corrected or substitute drawings have been received on Under 37 C.F.R. 1.84 these drawings are acceptable not acceptable (see explanation or Notice re Patent Drawing, PTO-948).			
10.		The proposed add	The proposed additional or substitute sheet(s) of drawings, filed on has (have) been approved by the examiner (see explanation).		
11.		The proposed draw	ving correction, filed or	on, has been approved. disapproved (see explanation).	
12.		Acknowledgment is made of the claim for priority under U.S.C. 119. The certified copy has been received not been re-			been received on not been received
				no; filed on	
13.		Since this applicati	on appears to be in co	ndition for allowance except for formal matters, pro-	eacution as to the marks is closed in

accordance with the practice under Ex parte Quayle, 1935 C.D. 11; 453 O.G. 213.

Serial No. 07/822043 -2-Art Unit 1811

## SUPPLEMENTAL RESTRICTION

Applicant in paper no.9 elected the Group 11 invention reading on autotaxin and peptides thereof individually as well as attached to solid phase supports and additionally drawn to methods of purifying autotaxin and claims 3-6, 11-12 and 16-17. After further consideration the following additional restriction to the following groups is warranted:

- 10 I. Claims 3-6 and 16-17 are drawn to autotaxin and peptides thereof separately and bound to a solid support, classified in Class 530, subclasses 324-330,350 and 402.
- II. Claims 11-12 drawn to a method of purifying an autotaxin peptide, classified in 530 subclass 412+

The inventions are distinct, each from the other because of the following reasons:

Inventions 1 and 1I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (M.P.E.P. § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as by chemical or recombinant means (see ie. specification at page 12, lines 6-9) or by a different purification protocol utilizing different separation technique such as HPLC on a reversed phase C-18 column, thin layer chromatography, and electrophoresis just to name a few.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, divergent subject matter and different search, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

A telephone call was made to Watson Scott on 9/7/92 to request an oral election to the above restriction requirement, but did not result in an election being made.

Serial No. 07/822043 Art Unit 1811

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
